throw into the trash can. WORST GAME I HAVE EVER PLAYED JUST BECAUSE OF CONTROLS!!!!. The game for SinglePlayer is good, but this expansion is not worth it.

Been trying to play multiplayer and you can't even do 1 room before the game crashes or kicks someone, it should state that this DLC is early, and is very VERY bugged for multiplayer, i do not recommend you to buy this DLC for multiplayer.. Why does steam let people upload games that dont even work, runs terribly and crashes constantly.. INDIE TRASH

YOU'RE BETTER OFF PLAYING A PROPER PS1/PS2/NES GAME THAN WASTING YOUR TIME ON THIS TRASH 0/10 SHAME ON THE GAME DEV. Reptilian Rebellion is a pretty straight forward shoot 'em up. You pick a character based on your playstyle and attempt to thwart a New World Order - or a bunch of reptiles attempting to take over. You're limited to moving up and down in the center of the screen, shooting attackers from either side. As you progress, the enemies become more difficult and develop different characteristics - such as shields, shooting back, or becoming faster. Kill enough and you may just end up on the leaderboard! Your kills are also carried over in a total reptiles killed counter that goes towards unlocking other characters to use.

Overall the game is pretty fun for what it is and the low price. I definitely recommend checking it out and having a bit of fun with it. The only complaint I really have is using the Z key to shoot while using WASD or arrow keys to move. It feels a bit awkward but isn't a terribly major issue.

<https://youtu.be/V2HbM0kg6hAA>. Worst Thing I've Ever Played Requesting My Money Back. I liked this game.. It's a pity but it do not worth its money at all. Poor cockpit graphics, inaccurate instruments and knobs (it's very hard to move a NAV's knobs properly, they do not pushing etc.). The default FSX Cessna has much more readable instruments, than this one. And compare to A2A models this is just like a joke. Don't buy it.. I must say I have very mixed feelings about this game after playing through the story. I bought it because I liked Fary Cry 3: Blood Dragon.

The story in this game is entertaining and the soundtrack is great. The A E S T H E T I C S are on point but man the controls are just awful. I enjoyed the voice acting, and I think the game is very pretty, for what kind of game it is. However if you aren't usually a fan of the sidescrolling biker games, prepare to be frustrated. And ultimately.. While I really enjoyed the story.. For this price, I wouldn't really recomend this game to others unless you REALLY like this genre.

Great game! A bit short for the price BUT I'm not overly disappointed as I'm looking forward to some DLC in the future. This game has tons of potential and had me hooked from the start! I streamed it in its entirety and my viewers enjoyed it as well as helped me along several times! Thanks devs for a game well done! The puzzles were spectacular but the ending needed work as observed and quoted from a viewer "Creativone" on youtube.. My main issue was figuring out the controls. I was surprised that I couldn't even use the mouse!

let alone, my bad computer can't run it ;-;. Weird(ly good). Pros

- Game can be for the first few levels
- Easily obtainable achievements for you achievement hunters!
- Currency system

Cons

- The game lacks any motive and or drive to keep playing.
- The shop for currency is lackluster considering that there are only three items.
- Wonky physics
- Levels lack difficulty
- Game breaking glitch where the game locks your cursor in the middle of the screen preventing you from going to the next level and the only way to avoid this is to ALT+TAB out and in which is a downside to anyone's experience old or young!

Overall I think this game could be fun for kids under twelve or for a quick buy to waste some time getting achievements or trading cards, but, I have to say this game didn't quite hit the mark for me. So no, I don't recommend this game.. This game is my favorite card game, it's extremely satisfying to play, perfectly paced, and extremely balanced. I have 50 hours on steam and I only wish I had a tracker on my phone, because there's a lot more on there. I've only ever bought the base game and it's a shame because I'd want to try others, but I'm still not bored of the base deck after 100+ hours. 10/10. Very nice, and good for the price. Loving the pro version and cold start. Battery Isolation, ETH loading on the engine sounds. Headcode blinds. Having seen the AP one on his site, I wished I forked out the £320 for all the variants.

Only problem is the CSR doesn't work in the Railtour scenario. Looks like the CSR boards at the side of the track are missing, so you keep getting held at phantom red signals and having to TAB through.

On the whole. Very good.

As with all AP stuff, would definitely recommend.. Great game. Kids are learning to play as well. Fun multiplayer too.
