Freedom Hosting

[page](#) [discussion](#) [edit](#) [history](#)

Freedom Hosting offers free anonymous hosting with PHP, MySQL and FTP support.

It must be mentioned that the service does NOT allow "illegal" files. This may forbid all sorts of interesting content since nothing at the site indicates which country the service is located in. This means that it is impossible to know which countries laws apply, and this in turn makes it impossible to know what is and what is not "legal". Though on the front page of the site the admin makes it clear that it does not host such things he does not seem to take any action.

The service offers it's users their own .onion domain(s), ftp access, a MySQL database and resource-restricted PHP scripting.

Problems

[edit]

While Freedom Hosting is a great service for faggots and actually the only one that keeps pedo scum alive, it tends to cause serious problems to hosted sites from time to time. Now you are all going to prison though so its all good. Well done FBI.

- For example, some changes in MySQL installation made in 2010 caused a lot of sites, including all Mediawiki-based and some forums, to become defunct as they were not able to access their databases any more. Some of those site were fixed and able to work again after several months (May 2011).
- Some accounts are unable to execute any PHP scripts. There is an error message that reads: *Fatal error: Unknown: Failed opening required '/home/fh/users/X/Y/Z/www/index.php' (include_path= './usr/local/share/pear') in Unknown on line 0*. Probably a problem with broken permissions.
- Additionally, since the fall of [Onionforum](#) in October 2010, there is no way to contact Freedom Hosting's admin. Try freedomhosting@tormail.net.
- There are several compatibility issues with no updates in sight.....

Hacking

[edit]

In October 2011, anonymous hackers temporarily shutdown Freedom Hosting with an operation dubbed Operation Darknet. FH was the victim of DoS attacks which resulted in unavailability of php or mysql on hosted sites. A user registered an account and used it to run extremely slow mysql queries among other things to purposely harm the server.

For this reason FH had temporarily closed the creation of new accounts. Because of the ongoing threat from Anonymous, FH has changed their registration system so that to register an account one must be invited by an existing member. All existing members who have logged in to their account in the last 2 months are given 1 invite for each month they have been a member, and they use them to invite others.

There is also the option to pay a one time fee of about \$5 payable in bitcoins.

Demise

[edit]

Stop trying to make this into a freedom of speech issue. It has nothing to do with freedom of speech. You force another human being to do something against their will and then complain when you are put in prison? Fucking pedo idiots.

Ever shared a picture of somebody smoking weed? You better go to prison for dealing with weed and cocaine and whatnot you filthy drug dealer scum.

Mr Marques will have his fucking balls cut off in prison for being a child abusing bitch coward. How do you feel now idiots? Since most of you were too thick to even install noscript it seems likely that many of you who visited these sites will also be getting sent to prison soon. Hahaha.
